-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Khoshnevis (US Patent 6,589,471).

Khoshnevis discloses a method and apparatus for manufacturing three-dimensional objects. The process 300 includes laying down a thin powder layer 310, depositing a sintering inhibitor 320, and sintering the powder later by radiation 340. Khoshnevis discloses several mechanisms for depositing the sintering inhibitor 320. They include: depositing a heat reflective material 600; depositing a heat-isolating material 610; depositing an anti-sintering agent 620 that oxidizes the metal powder such

as alcohol or oil; and depositing an isolating material such as a ceramic slurry and base powder of polymer, metal or ceramic (see col. 4, line 16 through col. 5, line 7).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Khoshnevis as described above in paragraph 2.

Without the disclosure of unexpected results, it is the examiner's position that the specific materials, control features (i.e. analyzing the description and determining what would be appropriate) and consolidation technique are within the purview of one having ordinary skill in the art and would have been obvious to employ in the method and apparatus of Khoshnevis as a matter of design choice based on the physical requirements and properties of the articles being manufactured.

Specification

5. Applicant is requested to update the applications listed on page 1, lines 9-10 of the specification.
